

Tick 1

Chungry returns **FAIL**,
selector moves on.
Cbattery returns **SUCC**:
selector short-circuits,
a_eat is not evaluated.

root = SUCCESS

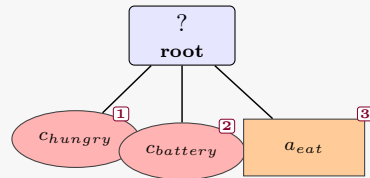

Tick 2

Chungry now returns **SUCC**,
selector short-circuits
at the first child;
Cbattery and *a_eat* are skipped.

root = SUCCESS

Tick 3

Both checks return **FAIL**; selector falls
through to the action,
which starts eating
and returns **RUN-**
NING (not yet finished).

root = RUNNING
